PROFESSIONAL SUMMARY

Engineering-trained analyst and M.S. in Business Analytics student with internship experience in manufacturing and powertrain testing. Skilled in SQL, Python, Excel, Power BI, and AI-assisted product development. Strong background in structured problem-solving, data analysis, process improvement, and building user-focused digital products from concept to prototype.

EDUCATION

Arizona State University Jan 2026 – May 2027

Master of Science in Business Analytics

- GPA: 4.0
- Relevant Coursework: Programming AI & Analytics in Business, Descriptive & Predictive Analytics, Enterprise Data Analytics

Arizona State University

Aug 2022 – Dec 2025

Bachelor of Science in Mechanical Engineering

- GPA: 3.3
- Relevant Coursework: Mechanical Engineering Design I & II, System Controls I & II, Computer-Aided Engineering I & II, Experimental Statistics, Structural Mechanics, Thermodynamics, Fluid Mechanics, Circuits

EXPERIENCE

General Dynamics Mission Systems

Sep 2025 – Dec 2025

Manufacturing Engineer Intern

- Supported manufacturing engineering activities for the Air and Missile Defense Radar (AMDR) program in a high-reliability defense environment.
- Assisted with process documentation, cross-functional coordination, and production support to improve manufacturing execution.
- Contributed to engineering work tied to complex system build quality, readiness, and workflow efficiency.

Nissan Motor Co

May 2024 – Aug 2024

Powertrain Test Intern

- Executed powertrain test runs and collected measurement data to support engine calibration and performance evaluation.
- Organized, cleaned, and analyzed test data to identify trends, compare calibrations, and support engineering decisions.
- Built clear visuals and summaries to communicate findings and recommend adjustments for more efficient, consistent test workflows.

PROJECTS

The Human Reset | AI-Assisted iOS App & Book Project | [Full Manuscript](#)

- Designed an AI-assisted wellness app and companion manuscript focused on helping users reduce everyday environmental exposures through guided quizzes, prioritization logic, and action-based planning.
- Used AI tools to accelerate product ideation, feature definition, content structuring, and iterative UX refinement.

Radar-Readable Sign for Autonomous Vehicles | Engineering Capstone | [Capstone Report](#)

- Designed and tested radar-readable sign geometry for autonomous vehicle applications, focusing on improved signal return consistency in poor weather and low-visibility environments.

RoutineOS Habit System | Habit System App Prototype | [RoutineOS App](#)

- Designed a habit system app prototype with layered routines, sub-habits, and progress logic to make daily planning more structured, actionable, and sustainable.

Been There. Done That. | Interactive Travel App | [Travel Scrapbook App](#)

- Developed an interactive travel app with map-based tracking, trip history, and visual organization features to make travel records engaging and easy to explore.

TECHNICAL SKILLS

- Analytics & Data: SQL, Python, Excel, Power BI, MATLAB
- Product & Development: React, Next.js, Supabase, Vercel, Visual Studio Code, Wix Studio
- Engineering Tools: SolidWorks, ANSYS

LEADERSHIP & CERTIFICATIONS

- Certifications & Licenses: SDI Open Water Scuba Diver, Arizona Real Estate Salesperson, ASE Electrical, ASE Suspension, Ford ACE
- Training & Programs: EVIT Automotive Technologies
- Teaching: Tutor in Math and Science
- Leadership & Activities: National Honor Society, Varsity Court & Sand Volleyball, Travel Club Volleyball (Captain), Extreme Endurance
- Interests: Investing, Reading, Creative Writing, Painting, World Travel, Skiing, Snowboarding, Nissan 350Z Build
