PROFESSIONAL SUMMARY

Engineering-trained analyst pursuing an M.S. in Business Analytics, with paid internships in defense manufacturing and powertrain testing. Skilled in Excel, SQL, Python, Power BI, MATLAB, documentation, data analysis, process improvement, and translating technical findings into business and engineering decisions.

EDUCATION

Arizona State University

Jan 2026 – May 2027

Master of Science in Business Analytics

- GPA: 4.0
- Relevant Coursework: Programming AI & Analytics in Business, Descriptive & Predictive Analytics, Enterprise Data Analytics, Machine Learning

Arizona State University

Aug 2022 – Dec 2025

Bachelor of Science in Mechanical Engineering

- Relevant Coursework: Experimental Statistics, System Controls I & II, CAD/CAE I & II, Mechanical Design I & II, Thermodynamics, Fluid Mechanics, Circuits

EXPERIENCE

General Dynamics Mission Systems

Sep 2025 – Dec 2025

Manufacturing Engineer Intern

- Organized 500+ internal manufacturing documents used by 7 teams to support production readiness and workflow consistency.
- Updated AMDR process documentation and build-support records to clarify requirements and reduce handoff friction.
- Coordinated with engineering and production teams to track issues and support complex system assembly workflows.

Nissan Motor Co.

May 2024 – Aug 2024

Powertrain Test Intern

- Collected, cleaned, and analyzed powertrain test data to compare calibrations and support tuning decisions.
- Improved competitor powertrain analysis workflow efficiency by 25% through clearer data organization and visuals.
- Produced summaries that influenced 5 powertrain tuning decisions and made test findings easier to act on.

PROJECTS

Preventable Death Map | Python, Power BI, GitHub

- Built a Python and Power BI analytics project analyzing premature mortality patterns across 3,132 U.S. counties using public mortality, county health, and Census socioeconomic data.
- Cleaned and merged county-level datasets with pandas, built an interactive dashboard, and trained regression/Random Forest models that achieved 0.72 test R^2 using non-disease predictors.

Exhibit A / The Human Reset | AI-Assisted Consumer Product Intelligence App

- Built app logic that turns product research into quizzes, exposure flags, safer swaps, and action plans.
- Reached 1,000+ people in the first month through content testing, marketing, outreach, and feedback.

Radar-Readable Sign for Autonomous Vehicles | Engineering Capstone

- Designed and tested sign geometry to improve radar detectability in poor weather and low visibility.
- Analyzed test results and documented design findings in a final engineering capstone report.

RoutineOS Habit System | App Prototype

- Designed layered routines, sub-habits, progress logic, and structured planning flows for a daily habit app.

Been There. Done That. | Interactive Travel App

- Built a travel app concept with map tracking, trip history, and visual organization for travel records.

TECHNICAL SKILLS

- Analytics & Data: Excel, SQL, Python, Power BI, MATLAB, data cleaning, visualization, dashboards, reporting
- Product & Development: React, Next.js, Supabase, Vercel, GitHub, Visual Studio Code, Wix Studio, AI-assisted product development
- Engineering Tools: SolidWorks, ANSYS, SharePoint, Microsoft 365, Word, PowerPoint, process documentation

LEADERSHIP & CERTIFICATIONS

- Teaching: Math and Science Tutor
- Certifications & Licenses: Arizona Real Estate Salesperson, SDI Open Water Scuba Diver, ASE Electrical, ASE Suspension, Ford ACE
- Leadership & Activities: Volleyball Captain, National Honor Society, Extreme Endurance
