CAREER GOALS

I see patterns where others see problems, and I build order that lasts. Chaos has its beauty. It's the invitation to fix things. I learn fast, think in systems, and create processes that make life safer, smarter, and more efficient. Order isn't found; it's made.

EDUCATION

Arizona State University Jan 2026 – May 2027

Master of Science in Business Analytics

- GPA: 4.0
- Graduate coursework: Programming AI & Analytics in Business, Descriptive & Predictive Analytics, Enterprise Data Analytics

Arizona State University Aug 2022 – Dec 2025

Bachelor of Science in Mechanical Engineering

- GPA: 3.3
- Important Courses: Mechanical Engineering Design 1 & 2, System Controls 1 & 2, Computer-Aided Engineering 1 & 2, Experimental Statistics, Structural Mechanics 1, 2, & 3, Thermodynamics, Fluid Mechanics, Circuits

EXPERIENCE

General Dynamics Mission Systems Sep 2025 – Dec 2025

Manufacturing Engineer Intern

- Supported manufacturing engineering for the Air and Missile Defense Radar (AMDR) program. [See Project Here](#)

Nissan Motor Co May 2024 – Aug 2024

Powertrain Test Intern

- Executed powertrain test runs, gathered measurement data, and organized datasets for reliable analysis.
- Created fast analyses and visuals to identify patterns, compare calibrations, and support engineering decisions.
- Recommended test and tuning adjustments to improve efficiency and make test workflows more consistent.

PROJECTS

The Human Reset | [Full Manuscript](#)

- Created a structured health framework to help people reduce everyday toxic burden and rebuild a clearer, more resilient baseline.

Radar-Readable Sign for Autonomous Vehicles | [Capstone Report](#)

- Designed and tested radar-readable sign geometry to improve signal consistency and visibility for autonomous vehicles in poor conditions.

RoutineOS Habit System | [RoutineOS App](#)

- Built a habit system with layered routines, sub-habits, and analytics to make daily structure easier to sustain and act on.

Been There. Done That. | [Travel Scrapbook App](#)

- Developed an interactive travel scrapbook with map-based tracking and trip history to make travel memories more visual and organized.

TECHNICAL SKILLS

- Languages: SQL, Python, MATLAB
- Analytics & Visualization: Excel, Power BI
- Web Development: React, Next.js, Supabase, Vercel, Visual Studio Code, Wix Studio
- Engineering Tools: SolidWorks, ANSYS

LIFE SKILLS

- Certifications & Licenses: SDI Open Water Scuba Diver, Arizona Real Estate Salesperson, ASE Electrical, ASE Suspension, Ford ACE
- Training & Programs: EVIT Automotive Technologies, Running Coach
- Teaching: Tutoring in Math and Science (All Levels)
- Leadership & Activities: National Honor Society, Varsity Court & Sand Volleyball, Travel Club Volleyball (Captain), Extreme Endurance
- Interests: Investing, Reading, Creative Writing, Painting, World Travel, Skiing, Snowboarding, Ongoing 350 Z Build
