PROFESSIONAL SUMMARY

Operations Analyst with a background in mechanical engineering and business analytics, with experience across data analysis, process improvement, and technical operations. Skilled in Excel, SQL, Python, Snowflake, Power BI, MATLAB, documentation, and translating complex findings into clear operational and business decisions.

EDUCATION

Arizona State University Jan 2026 – May 2027

Master of Science in Business Analytics

- GPA: 4.0
- Relevant Coursework: AI & Analytics, Predictive Analytics, Enterprise Data Analytics, Machine Learning

Arizona State University Aug 2022 – Dec 2025

Bachelor of Science in Mechanical Engineering

- Relevant Coursework: Experimental Statistics, System Controls I & II, CAD/CAE I & II, Mechanical Design I & II, Thermodynamics, Fluid Mechanics, Circuits

EXPERIENCE

OpenAP | **Operations Analyst** Sep 2026 – Present

- Manage audience data workflows across partners, including formatting, validation, QA, and delivery.
- Use Python, Google Colab, Excel, and Snowflake to transform and QA datasets for audience activation.
- Improve recurring workflows through automation, documentation, troubleshooting, and standardization.

General Dynamics Mission Systems | **Manufacturing Engineer Intern** Sep 2025 – Dec 2025

- Organized 500+ manufacturing documents used by 7 teams to improve production readiness and consistency.
- Updated AMDR process and build support documentation to clarify requirements and reduce handoff friction.
- Coordinated with engineering and production teams to track issues and support complex system assembly.

Nissan Motor Co. | **Powertrain Test Intern** May 2024 – Aug 2024

- Collected, cleaned, and analyzed powertrain test data to compare calibrations and support tuning decisions.
- Improved competitor analysis workflow efficiency by 25% through clearer data organization and visuals.
- Produced summaries that influenced 5 powertrain tuning decisions and made test findings easier to act on.

PROJECTS

Preventable Death Map | Python, Power BI, GitHub

- Built a Python and Power BI dashboard and models across 3,132 U.S. counties, achieving 0.72 test R^2 .

Exhibit A: Cleaner Living | AI-Assisted Consumer Product Intelligence App

- Built consumer app logic that turns product research into quizzes, exposure flags, safer swaps, and action plans.

Radar-Readable Sign for Autonomous Vehicles | Engineering Capstone

- Designed and tested radar readable sign geometry to improve autonomous vehicle detection in poor weather.

RoutineOS Habit System | App Prototype

- Designed a habit app prototype with layered routines, progress logic, and structured daily planning.

Been There. Done That. | Interactive Travel App

- Built and launched an interactive travel app with map-based tracking, trip history, and visual organization.

TECHNICAL SKILLS

- Analytics & Data: Excel, SQL, Python, Snowflake, Power BI, MATLAB, Google Colab, dashboards, reporting
- Product & Development: React, Next.js, Supabase, Vercel, GitHub, VS Code, Wix Studio, AI assisted development
- Engineering Tools: SolidWorks, ANSYS, SharePoint, Microsoft 365, Word, PowerPoint, process documentation

LEADERSHIP & CERTIFICATIONS

- Teaching: Math and Science Tutor
- Certifications: Arizona Real Estate Salesperson, SDI Open Water, ASE Electrical & Suspension, Ford ACE
- Leadership: Volleyball Captain, National Honor Society, Extreme Endurance
